

Windows 7 users: Download Finger Relief Keyboard Layout for Windows 7. Simply unzip this file and run the Setup.exe file to install the Finger Relief Keyboard.

Installation Steps:

1. In Windows 7 , click on START button and in the search box type in: REGIONS AND LANGUAGE, then press ENTER.
2. A new window will pop up and then click on the Keyboards and Languages tab.
3. Click on Change Keyboards button.
4. From the list of keyboards, select Finger Relief keyboard and click OK! That's it. The Finger Relief keyboard is now selected! To go back to US keyboard, just follow steps above and select U.S. Keyboard instead of Finger relief.
